

Product Teardown

Subspace.money

Consumer Subscription & Sharing Ecosystem Analysis

This teardown evaluates Subspace.money from the perspective of a real user exploring the platform's onboarding, subscription discovery, search experience, wallet ecosystem, and marketplace flows. The analysis focuses on identifying high-impact product, UX, and growth opportunities across trust design, user retention, network effects, and positioning clarity.

The screenshot shows the Subspace.money homepage with the following annotations:

- 1** Location visibility is low. Suggestion: Make location more prominent and editable.
- 2** Homepage is offer-heavy and not user-centric. Suggestion: Add personalized or category-based highlights.
- 3** Search bar lacks prominence. Suggestion: Increase size, improve contrast and visibility.
- 4** No notifications or update center. Suggestion: Add notifications icon for offers, chats, updates.
- 5** Explore tab lacks strong active-state visibility. Suggestion: Improve active state and hierarchy.
- 6** Premium benefits are not clearly communicated. Suggestion: Highlight unique benefits and value clearly.
- 7** Too many brands shown together. Suggestion: Show top 6-8 brands or add "View all" option.
- 8** No personalized recommendations section. Suggestion: Add "Recommended for you" based on user behavior.

KEY ISSUES

- 1 Location visibility is low.
- 2 Explore tab lacks strong active-state visibility.
- 3 Search bar lacks prominence.
- 4 No notifications or update center.
- 5 Homepage is offer-heavy and not user-centric.
- 6 Premium benefits are not clearly communicated.
- 7 Too many brands shown together.
- 8 No personalized recommendations section.

SUGGESTIONS

- ✓ Make location more prominent and editable.
- ✓ Improve active state and hierarchy of Explore tab.
- ✓ Increase search bar size and improve visibility.
- ✓ Add notifications icon for offers, chats, updates.
- ✓ Personalize homepage with relevant categories.
- ✓ Highlight premium benefits and unique value.
- ✓ Show top 6-8 brands or add "View all" option.
- ✓ Add "Recommended for you" section based on user behavior.

The homepage creates a visually engaging first impression but lacks strong product hierarchy and personalization. The interface heavily prioritizes promotional banners and discounts, making it difficult for first-time users to immediately understand the platform's core value proposition. Key interaction areas such as search, recommendations, and premium offerings can be made more intuitive and user-centric to improve onboarding clarity, engagement, and retention.

Product Overview & User Journey Findings

Understanding the core experience, navigation flow, and product positioning

Product Overview

Subspace.money positions itself as a subscription and digital services ecosystem focused on subscription management, savings, sharing, gift cards, and premium memberships. The platform combines marketplace discovery with financial utility features such as shared subscriptions, discounted digital products, and AI-powered operational workflows.

The homepage establishes a visually engaging marketplace experience with strong promotional visibility and multiple service categories. However, the interface currently emphasizes discounts and offers more than user guidance, making the platform's core value proposition less immediately understandable for first-time users. Navigation hierarchy, personalization, and feature prioritization can be further optimized to create a clearer and more intuitive onboarding experience.

User Journey Explored

- Homepage exploration
- Search interaction
- Subscription discovery
- Premium section analysis
- Brand/category navigation
- Marketplace browsing
- User account & onboarding review

The shared subscription marketplace clearly highlights the platform's core business model through group-based pricing and subscription accessibility. The interface successfully communicates affordability and variety across major digital services. However, the experience can be further strengthened by introducing trust indicators, verified group signals, savings transparency, and personalized recommendations to improve user confidence and long-term engagement.

Feedback #1 — Homepage Positioning & UX Clarity

The homepage creates strong promotional visibility but lacks clear product communication for first-time users.

Observed

The homepage heavily prioritizes promotional banners, discounts, and marketplace cards across multiple categories such as subscriptions, gift cards, OTT services, and premium memberships. While visually active, the interface does not immediately communicate the platform's primary value proposition to first-time users.

Problem

The current experience creates cognitive overload during the initial interaction. Users may struggle to understand whether Subspace.money is primarily a subscription-sharing platform, discount marketplace, finance utility, or premium membership ecosystem. This positioning ambiguity can negatively impact onboarding clarity, trust perception, and feature discovery.

Ship Instead

Introduce a clearer homepage hierarchy with a focused value proposition section above promotional banners. Add personalized onboarding prompts, category-based recommendations, and contextual messaging such as “Save money through shared subscriptions” or “Discover affordable premium memberships.” Reducing promotional density and improving content prioritization can significantly improve first-time user comprehension and engagement.

Impact Assessment

Impact: High

Effort: Medium

Priority: P0

Feedback #2 — Shared Subscription Experience & Trust Signals

The subscription-sharing marketplace is feature-rich but lacks strong trust-building mechanisms for first-time users.

Observed

The shared subscription marketplace effectively communicates affordability through visible group-based pricing and a large inventory of digital services. Multiple subscription options across OTT and premium services reinforce the platform's marketplace depth and sharing ecosystem.

Problem

While pricing and inventory visibility are strong, the platform currently lacks trust-building signals that help users evaluate group reliability and purchase confidence. Users are not given visibility into group quality, successful transactions, verification status, or user credibility, which can increase hesitation during purchase decisions.

Ship Instead

Introduce trust-focused UI elements such as verified groups, member ratings, transaction reliability scores, delivery assurance indicators, and transparent savings comparisons. Adding social proof and trust signals can significantly improve conversion rates, retention, and long-term marketplace credibility.

Impact Assessment

Impact: High

Effort: Medium

Priority: P1

Category: Marketplace UX + Trust

The screenshot displays the SubSpace app interface for shared subscriptions. The header includes the SubSpace logo, delivery location (Sector, 70 C, Shahpur, Swaraj Nagar, Ka...), and navigation links (Home, Explore, Wallet, Chat, Cart). A search bar and user profile are also visible.

The main section, titled "Shared Subscriptions", lists various subscription options with annotations for improvement:

- 1 Add Trust Indicators:** Show ratings, reviews, and verified badges to build confidence.
- 2 Show Key Benefits:** Display savings %, total members, and group health for clarity.
- 3 Highlight Availability:** Use progress bars or counters to show seat availability clearly.
- 4 Improve Scanability:** Add filters/sorting (price, popularity, availability) to help users find faster.
- 5 Build More Confidence:** Add guarantees like secure payments, instant delivery, and refund policy.

The listings include details such as the service name, rating, verified status, price per seat, and savings percentage. Examples of listings include:

- Youtube Premium Men... (₹99 /seat, 4.6 rating, 25% saving)
- Netflix Premium Plan (₹163 /seat, 4.5 rating, 44% saving)
- JioHotstar Premium O... (₹233 /seat, 4.7 rating, 30% saving)
- MX Player MX Gold Ye... (₹250 /seat, 4.3 rating, 27% saving)
- Prime Video only Mont... (₹90 /seat, 4.4 rating, 20% saving)
- Zomato (₹225 /seat, 4.2 rating)
- Netflix Standard Plan (₹250 /seat, 4.4 rating, 16% saving)
- JioHotstar Premium 1... (₹100 /seat, 4.6 rating, 40% saving)
- JioHotstar Premium Y... (₹733 /seat, 4.7 rating, 18% saving)
- Prime Video only Quar... (₹230 /seat, 4.4 rating, 24% saving)
- Prime Video only Yout... (₹500 /seat, 4.5 rating, 28% saving)
- Build More Confidence (₹240 /seat, 4.2 rating, 15% saving)

Key Takeaway: Adding trust signals, availability clarity, and better filtering will improve confidence and help users make faster purchase decisions.

Feedback #3 — Discovery Experience & Category Navigation

The platform offers a wide range of products but the discovery experience feels cluttered and lacks personalization.

Observed

The platform provides a vast inventory across multiple categories such as shopping, entertainment, travel, food, and more. Users can search brands and apply filters, and a grid layout is used to showcase a wide variety of deals, vouchers, and subscriptions.

Problem

Too many categories are displayed at once, creating cognitive overload. The product cards have inconsistent styles, images, and information hierarchy, making the interface visually noisy. There is no clear personalization or recommendation section, which makes it harder for users to discover relevant offers quickly.

Ship Instead

Group categories under primary buckets with scrollable chips or a “View All” option. Standardize card design for a consistent visual experience. Introduce personalized recommendations, trending deals, and relevance-based sorting to help users discover what matters most to them faster.

Impact Assessment

Impact: High

Effort: Medium

Priority: P1

Category: Discovery UX

Strategic Recommendations & Prioritization

High-impact opportunities identified across onboarding, trust, and discovery experience.

Final Recommendations

1. Improve onboarding clarity with a stronger and more focused value proposition.
2. Introduce trust-building mechanisms such as verified groups, ratings, and reliability indicators for shared subscriptions.
3. Simplify category navigation and reduce cognitive overload through better hierarchy and personalization.
4. Leverage recommendation systems and behavioral signals for smarter product discovery.
5. Standardize marketplace card design for a cleaner and more consistent browsing experience.

Project Matrix

Prioritizing opportunities based on Impact vs. Effort to drive maximum value.

Final Thoughts

Subspace.money demonstrates strong marketplace depth, pricing accessibility, and subscription-sharing potential. The platform's biggest opportunities now lie in improving onboarding clarity, trust architecture, and personalized discovery. Addressing these areas can significantly improve user confidence, retention, and long-term marketplace scalability.

Thank You

Prepared for the Product Intern Assignment

This product teardown was created through hands-on exploration of the Subspace.money platform, focusing on user experience, marketplace discovery, trust architecture, onboarding clarity, and subscription-sharing workflows. The analysis aims to identify practical, high-impact improvements that can enhance user confidence, engagement, and long-term platform scalability.
